SPACEDEV

BLOCKCHAIN SOFTWARE & PRODUCT DEVELOPMENT

SpaceDev is a cutting-edge software factory catering to enterprise companies and startups in the US market. With 6 years of experience and a strong team of 50 professionals, we take pride in working with industry giants like Microsoft and Apple, as well as high-impact startups like Drata, valued at \$2 billion. Our expertise extends to blockchain development.

At SpaceDev, we offer two distinct services: staff augmentation and in-house product development. Staff augmentation involves providing skilled resources to complement our clients' existing teams. In-house product development, on the other hand, entails building a complete product from the ground up.

BPROT

MAKING CYBERSECURITY EASY

Bprot is a software that allows you to monitor and control Internet usage, increase security, protect and alert to possible vulnerabilities in equipment or applications and measure the work of users, local or remote in an easy and powerful way.

We work with several companies and institutions of different sectors who not only found in it a reliable, robust and user-friendly solution, but also thanks to their requests of new functionalities, collaborate in maintaining the constant growth of Bprot given the new technologies and threats that arise every day.

BIOMETRISH

BIOMETRISH

CONTINUOUS TWO-FACTOR AUTHENTICATION WITH ZERO FRICTION
USING CURSOR BIOMETRICS

Biometrish is a cutting-edge technology company that provides continuous two-factor authentication with zero friction using cursor biometrics. Our innovative solution leverages the unique patterns and movements of a user's cursor movements on both mobile and web as a biometric identifier.

This allows for a seamless and highly secure authentication process without additional hardware or software and no additional effort on the user's part. Therefore making it an ideal solution for businesses and organizations that require robust security measures without sacrificing any convenience or ease of use.

TECSPAL

ONBOARDING, OFFBOARDING AND STORAGE OF ANY HARDWARE NEEDED TO WORK, BEING REMOTE OR HYBRID. WE ALSO PROVIDE A FREE PLATFORM FOR HARDWARE MANAGEMENT.

We help companies equip their offices and remote workers all over the world, including LATAM, APAC and Spain. We supply all of the equipment for new employees, we offboard hardware if someone leaves the company and store everything locally to reuse on new people. Throughout our platform, we help our clients with their hardware management, saving money and time while providing the best equipment for their personnel.

KEAML

CLOUD DEVELOPMENT AND TRAINING ENVIRONMENTS FOR MACHINE LEARNING

KeaML is a platform designed for data scientists and machine learning engineers seeking a hassle-free alternative to the complexities of setting up cloud-based development and training environments directly on AWS, Azure, or GCP consoles. By providing a highly scalable and customizable solution, KeaML simplifies the process, allowing users to concentrate on data-driven innovation and achieve unparalleled success in their field. This robust platform streamlines the creation of cloud environments, eliminating the time-consuming and often frustrating tasks associated with managing resources on major cloud providers' consoles. With KeaML, users can effortlessly spin up their cloud environments, optimize workflows, and accelerate time-to-market, ensuring they stay ahead of the curve in their industry.
